

E-Commerce Customer Profitability & Retention Analytics

Client-facing Business Intelligence Portfolio Project

Core question: Are we growing revenue, or are we growing profitable and loyal customers?

Report Architecture

Page	Business purpose
01	Executive Command Center — growth, profit, retention and signals
02	Commercial Performance — revenue drivers by customer, category, channel and market
03	Customer Profitability — revenue vs profit, margin and customer value
04	Retention & Cohorts — repeat purchase, retention curve and cohort quality
05	Discount & Returns — promotion economics and revenue leakage
06	Management Actions — evidence, financial exposure and recommended action

Technical stack

SQL → Power Query → Star Schema → DAX → Power BI → Business Recommendations

The six PNG dashboard previews are included specifically for GitHub/LinkedIn presentation. They are visual references for the final Power BI implementation.
